

# Problem Statements

- 1) There is no platform that performs a search from a list of criteria and outputs both events and activities.
- 2) Most of the existing event and activity platforms don't provide simultaneous filtering mechanisms which take weather and time into account.
- 3) Most of the existing event and activity platforms don't offer reviews for the recurring events and activities.
- 4) Most of the existing event and activity platforms don't offer ratings for the recurring events and activities.
